AMIN KHODDAM

Frontend Developer (React.js | Next.js)
Tehran, Iran | amin.khoddam.connect@gmail.com | linkedin | github

PROFESSIONAL SUMMARY

Frontend Developer with 2+ years building production React and Next.js apps in TypeScript. **Sole frontend developer** of a bilingual (EN/FA, RTL) B2B marketplace with **130 pages** and a tender workflow. Experienced in real-time features, AI chat interfaces, and **performance optimization**, using Claude Code to ship faster.

TECHNICAL SKILLS

Core: React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3
UI & Styling: Tailwind CSS, shadcn/ui, Material UI, Responsive Design, Design System Implementation
Forms & UX: React Hook Form, Zod, i18n, RTL, Accessibility
Data & State: React Query (TanStack Query), Redux Toolkit, Zustand, REST APIs, WebSocket, Vercel AI SDK
Performance: Dynamic Imports, Code Splitting, SSR/SSG/ISR, Lighthouse, Chrome DevTools
Tools: Git, GitLab, GitHub, Jira, Postman, Swagger, Figma (design implementation), Claude Code
Personal projects: Node.js, Express.js, MongoDB, Mongoose, Docker, CI/CD, Vitest, Sentry, Socket.IO

PROFESSIONAL EXPERIENCE

Frontend Developer | Pars Azmaye Teb | *Full-time | Tehran, Iran | March 2024 – March 2026*

Personal care and cosmetics company; five-person product team (backend, UI/UX, QA, tech lead, frontend).

- Built a bilingual (EN/FA, RTL) B2B marketplace in Next.js from scratch as the **sole frontend developer**, with **130 pages** across admin, supplier, customer and public areas and permission-based access.
- Implemented a **tender workflow** across customer, supplier and admin views **(17 pages)**: requests receive offers and close on acceptance or deadline expiry.
- Developed a **real-time ticketing chat** (WebSocket) with reconnection, file upload/download and notifications.
- Built a **central Axios layer** with role-specific auth headers and unified error handling that ends invalid sessions and redirects to login or error pages.
- Built an **AI product-discovery chat** in React (Vite) with streamed responses via the Vercel AI SDK, React Query and Zustand state, and AbortController-based stop control.
- Applied dynamic imports and per-page **SSR/SSG/ISR** rendering, and tuned React Query caching to avoid redundant requests; used Lighthouse and DevTools to diagnose bottlenecks.

Frontend Developer Intern | Pars Azmaye Teb | *Full-time | Tehran, Iran | May 2023 – February 2024*

- Built a **task manager** in Next.js with Redux Toolkit and Material UI, featuring a calendar timeline, personal and group tasks, and WebSocket notifications.
- Extended the existing storefront with **product filtering** and a variant-driven product detail page (price and details by color, size and seller); debugged and optimized teammates' code.

PROJECTS *(Self-Directed, March 2026 – Present)*

Authentication API | *Node.js, Express.js, MongoDB, Zod*

- Built **JWT auth** with hashed refresh tokens, rotation and reuse detection, covered by **Vitest unit tests**.
- Added reusable auth and Zod validation middleware with centralized error handling.

Fintech Wallet Demo | *Next.js, Docker, GitHub Actions, Nginx*

- Containerized with **Docker Compose** and automated builds and deployments with **GitHub Actions CI/CD**.
- Deployed on a Linux VPS (Nginx, SSL, DNS, Cloudflare); **Lighthouse Performance: 98** (desktop).

EDUCATION & LANGUAGES

Bachelor of Computer Science - Islamic Azad University of Tehran *(2024 – Present)*

Persian - Native **| English -** Professional working proficiency (B2)
